The Dynaudio Confidence C1

The Confidence C1 achieves the same sound quality as the larger Confidence floorstanders in a compact package ideally suited for smaller listening areas. Its performance is the direct result of the considerable investment that went into developing the innovative driver and cabinet technology engineered for the Confidence line. The C1 cabinet is characteristic of the Confidence level construction, where a relatively large driver - mounted into the massive, independent front baffle, which also houses the tweeter - is integrated into a very slim enclosure.

The anti-resonance measures afford the drivers a most ideal environment in which to achieve their highest performance capabilities. The Esotar2 tweeter is mounted into a resonance-absorbing 10mm thick aluminum plate that is integrated into the contoured baffle. The rigid cabinet enclosure is mounted onto an MDF plinth, designed to allow a stable and secure connection to the optional Dynaudio Stand4 - a perfect solution for sound quality and a beautiful match aesthetically. In the finest Dynaudio tradition, the C1 is a compact loudspeaker delivering an extremely high level of performance and sound quality, yielding an impressively expansive and detailed soundstage even in two-channel stereo set ups. As a high-end multi-channel speaker in synergy with the Confidence Center, the C1 delivers true Confidence sound in any music or movie surround format.

Technical Data

Sensitivity	85 dB
IEC Long Term Power Handling	170 Watt
Impedance	4 Ohm
Frequency Range	45 Hz – 22 kHz
Internal Cabinet Volume	11,6 Litres
Principle	2 Way Bass Reflex
Crossover Frequencies	1800 Hz
Weight	10,9 kg
Dimensions (W x H x L in mm)	200 x 445 x 430
