The Dynaudio Confidence C2

With its slim, graceful profile, and its 155cm height, the Confidence C2 makes a bold statement as the entry floor standing model in the Confidence range. The advanced driver designs are housed in a massive baffle, which seemingly floats in front of the cabinet enclosure, forming a gently curved outline on its precisely moulded proportions. Audibly, perfectly accurate imaging is achieved, as is a soundstage with authentic dimensions, while vocals are rendered with an unbelievably natural precision.

In typical Danish fashion, Dynaudio pays meticulous attention to high quality workmanship and extraordinary value. Each Confidence model is built in Denmark, completely in-house, through a combination of advanced computer-aided production engineering and exhaustive hand-craftsmanship. The result is a high-end loudspeaker with a furniture grade cabinet that will endure for decades while always maintaining the beauty of its appearance. The performance of the C2 is further aided by the technical merit of its advanced drivers, the DDC technology and a balanced impedance. Low frequencies are reproduced effortlessly without consequence, and it is possible to utilize even inefficient power amplifiers due to the ease of drive achieved through its linear impedance.

Technical Data

Sensitivity	87 dB
IEC Long Term Power Handling	300 Watt
Impedance	4 Ohm
Frequency Range	28 Hz – 25 kHz
Internal Cabinet Volume	43 Litres
Principle	2 Way Bass Reflex
Crossover Frequencies	2200 Hz
Weight	40 kg
Dimensions (W x H x L in mm)	238 / 420 x 1550 x 445
